

1.0 INTRODUCTION

- 1.1 Reed Constructions Australia Pty Ltd (trading as The Reed Group) is committed to developing and implementing construction methods and practices that are environmentally sound and that meet the requirements of the relevant authority, and the community's needs and expectations of a construction company.

2.0 IMPLEMENTATION

- 2.1 The Reed Group is committed to implementing and maintaining an environmental management system which complies with the requirements of AS/NZS ISO 14001.
- 2.2 The Reed Group will implement and maintain a site specific environmental management plan for each site which complies with legislative requirements, relevant government environmental management system guidelines and the requirements of The Reed Group management system.
- 2.3 The Reed Group is committed to the principles of ecological sustainability and will demonstrate this where practicable through implementing energy efficient design, use of products that are recycled or have recycled content, waste minimisation, and prevention or minimisation of pollution.
- 2.4 Our commitment will be demonstrated by the implementation of a site specific environmental management plan which seeks to identify potential environmental hazards, assess the risks and implements control measures to prevent incidents from occurring.
- 2.5 The Reed Group is committed to being prepared and will demonstrate this by thorough planning and the allocation of adequate resources to ensure that the impacts of any incidents which may occur are minimised.
- 2.6 Our staff, subcontractors and suppliers are required to participate in and conform to the requirements of the site specific environmental management plan and meet their legal and moral obligations to the environment and the community at large.
- 2.7 Our staff, subcontractors and suppliers are required to contribute to the improvement of our environmental performance by seeking new and improved work methods, participating in our waste management programmes, and reporting any actual or potential problems or improvements as soon as they are identified.
