

Opus International Consultants and The Reed Group

Opus International Consultants and The Reed Group are leading multi-disciplinary infrastructure design and construction companies renowned for providing high quality engineering services.

Opus and Reed have partnered together to provide seamless design and construction (D&C) services throughout Australia, offering clients a 'one stop shop' approach to infrastructure projects in the Resources sector.

From project conception to completion, Opus and The Reed Group are synonymous with client focussed service excellence. Our collective team make a point of understanding clients' needs, working closely with them to achieve a timely, efficient and cost-effective outcome.

Our reputation is our most valued asset, and this translates to the skill and talent of our engineers, planners and contractors that collectively have the vision and expertise to deliver tailored, innovative and award winning solutions. We pride ourselves on delivering on time and on budget, every time.

Our Services

Together we offer a vast range of skills and experience with all types of design and construction projects. Our services include:

- Asset management
- Building design, architecture and condition assessments
- Civil, Structural, Mechanical and Electrical engineering
- Energy generation infrastructure
- Mining infrastructure
- Road, rail and other transportation infrastructure
- Water, environmental and heritage work

What we can provide

We work on a 'Best for project, best for client' approach to bring you:

- A holistic and collaborative approach to design and construction
- Total project management
- Multi-disciplinary skills and expertise
- On time delivery
- Project completion within budget
- Ensured constructability
- Local knowledge and a network of global expertise
- Whole of life asset management
- Ensured safety accreditation with links to accredited training organisations

Our People

Our people, many of whom are leaders in their field, have a vast amount of industry specific experience, giving you direct access to the latest in best practice, technology and construction techniques. Our project teams are at the forefront of award winning and innovative infrastructure design, construction and asset management.
